## School Overview

Lynwood Senior High School is an Independent Public School situated 15kms south of Perth and caters for Years 7 to 12 students. We are a unique school that specialises in Sustainability Education, both socially through a strong focus on building respect and concern for others as well environmentally and the part our students will play in the world of tomorrow. This focus has created a strong and positive culture within the school and has led to recognition that the school is 'a centre for Environment and Life Sciences education'. We are also the only recognised Specialist School for Environment and Life Sciences with opportunities for students state wide to apply for and attend this specialist course in Years 8 to 10. Through this program, strong partnerships with a range of universities, government and community organisations have been established and are leading the way in sustainability education. Our students are developing into contributing community members of both today and into the future.

Whilst our focus is sustainability we have a broad curriculum including a Specialist Soccer Program and a comprehensive choice of vocational education and training pathways for Year 11 and 12 students. Lynwood's success in preparing students for university in both the Sciences and Humanities is well documented with many students consistently in the top 5% of entrance scores and an exceptional overall Year 12 graduation rate.

Lynwood's overall statement of intent is to 'commit to the care and success of every student'. We achieve this by devoting time, effort and energy to each individual student under a system of mentors that develop a clear bond and relationship with each child. This attention to detail has meant that every student is nurtured to reach their own potential through quality teaching and individual care in their learning program.

- Vocational Education and Training in Schools Program

Implementation of VET across Australia is in accordance with the set of nationally agreed principles from Principles and Guidelines for Improving Outcomes for Vocational and Technical Education and Training (VTE) in Schools (2005 - 2008).

Vocational Education and Training (VET) in Schools programs are delivered as part of a broad, general education that combines study towards a senior secondary certificate (i.e. the Western Australian Certificate of Education - the WACE) with a nationally recognised VET qualification within the Australian Qualification Framework.

The specific areas identified as priority areas for VET in Schools for action in the Principles and Guidelines include:

- \* the establishment of VET in Schools by schools not previously involved in the delivery of VET in Schools
- \* expanding the range and spread of VET in Schools courses offered across industry sectors by schools already involved in the delivery of VET in Schools
- \* the establishment of VET in Schools courses in new industry areas and in industry areas currently not well subscribed in VET in Schools
- \* increasing participation in VET in Schools by particular student groups that are difficult to reach and/or service, for example, improving access for students in rural and remote areas and for educationally disadvantaged students including Indigenous students and students with a disability,
- \* developing strategies to maintain quality standards in VET in Schools including professional development
- \* increasing participation in School-Based New Apprenticeships (in WA these are called School Based Traineeships) and other trades related vocational courses which relate to skills shortages, and
- \* addressing areas of skills shortage.

#### **Specialist Programs**

- **Environmental and Life Sciences (2012)**
- **Soccer**

Lynwood Senior High School Academy of Excellence in Soccer enable students to 'Strive for Excellence'. Applicants for 2009 need to complete an application form prior to Friday 1st August to register for selection trials. Please contact the school on 9354 0600 for further information.
